Caller

**Family Member
Friend
or
Relay Service (TRS)**

Elderly / Hard of Hearing / Deaf User

**Easily connect a 3RD party to any telephone call
when the user needs help with the call.**

***One-Touch 3RD party connect to a family member, friend,
or the telecommunications relay service (TRS)!***

Additional Features and Specifications on Back

Mobile-Link requires a 3-WAY CALLING subscription service available from your local telephone company.

MOBILE-LINK™

ML-150

Features:

ONE-TOUCH ASSISTANT

Easily get assistance with a telephone call whenever you need it from a family member, friend, or the telecommunications relay service (TRS). Press the ASSISTANT button and Mobile-Link will connect your third party assistant to the live call. Then let your assistant help you with the call. Works for both inbound and outbound calls. ***No more struggling to understand what the caller wants.***

ONE-TOUCH CALL TRANSFER

You can also easily transfer the call to your family member or friend if you are having difficulty with it. After receiving an incoming call, press the ASSISTANT button and hang-up. Mobile-Link will transfer the live call to your family member or friend. ***Let your family member or friend take your difficult calls.***

AUTOMATIC TRANSFER

You can set Mobile-Link to automatically transfer your unanswered calls to your family member or friend. Mobile-Link will automatically transfer the call after the 4th ring if you do not answer. ***No more missing important calls and alert your family member or friend when your not answering the phone.***

PERSONALIZED TRANSFER GREETING

Record a personalized transfer greeting to give additional information to your callers. ***For example, "Please hold while your call is being transferred to my daughter."***

EASY INSTALLATION AND SETUP

Call your family member or friend and then hang up. Mobile-Link is now ready to 3RD party connect and transfer your calls. ***Designed for quick installation and setup!***

Stop Missing Important Phone Calls!

Ideal for the Elderly, Hard Of Hearing, or Deaf user who needs help with telephone calls.

Typical Usages

Elderly/Hard of Hearing User:

"I sometimes get calls that I have difficulty understanding. Mobile-Link provides a simple way for me to connect my daughter to the call so she can help me with it."

"I have difficulty accessing voicemail or working an answering machine. Now I don't have to worry about it as all my unanswered calls go to my son who helps me."

Deaf User:

"I sometimes get voice calls and need a simple way to connect these calls to the TTY/VCO relay service. Mobile-Link allows me to press the ASSISTANT button and get the relay operator easily added to the call as a 3rd party."

Mobile-Link Requirements:

- 3-WAY CALLING subscription service from your local telephone company.
- Standard Home/Office Telephone Line. Analog (POTS) Home/Office/PBX line.
- Standard Telephone Jack: RJ11 or RJ14.
